

Possible places for our paper

I checked the official calls and CORE 2023 rankings.

20 September 2026

Conference	Ranking	Deadline
IEEE SaTML 2027	Not listed	22 Sep abstract; 29 Sep paper
CVPR 2027	CORE A*	10 Nov register; 16 Nov paper
IEEE S&P 2027	CORE A*	10 Nov register; 17 Nov paper
PETS / PoPETs 2027	CORE A	Paper 30 Nov 2026
USENIX Security 2027	CORE A*	19 Jan register; 26 Jan paper

Our thoughts

PETS looks like the most realistic ranked conference for this paper. It is CORE A and its topic includes information leakage and privacy attacks. CVPR and IEEE S&P are CORE A*, but the current paper may not fit their main contribution well enough. SaTML fits the topic, but the deadline is very close and it is not listed in CORE 2023.

Journal option

IEEE T-BIOM is still my first journal choice because it directly covers biometric security. IEEE TIFS is another strong journal, but it has a higher security novelty bar. Both accept regular papers throughout the year. CORE A and A* are conference labels, so I did not give these journals a CORE rank.

Question for us

Should we prepare for PETS by 30 November, or submit the longer version to IEEE T-BIOM?

Before choosing, we should confirm which ranking list our department uses. CORE is not the only system.
